supabase, firebase, mongodb
solidity, smart-contracts, wagmi
web3-js, ether-js, blockchain
web-sockets, cloudinary, resend, clerk

EDUCATION

Bachelor of Engineering

Dayananda Sagar College of Engineering

2012-2026

1st year average cgpa 9.3

2nd year average cgpa 8.6 till now

High school, from kishangarh, Rajasthan
MSS Public School

12th cbse board cgpa 9.2

10th cbse board cgpa 9.2

LANGUAGES

typescript
C++
c
java
go
python
javascript

PROFILE

I am a second-year BE student at DSCE, Bangalore, with a strong aptitude for problem-solving and innovative thinking. My academic journey has equipped me with the skills to approach challenges creatively and develop effective solutions

I have attended numerous events like ETC India, Polygon Connect, and File Bangalore, where I gained valuable experience and expanded my professional network. Additionally, I was selected for Buildspace Season 5 and am currently working on a project for it.

Projects

serverless-adv-blog - <https://adv-medium.vercel.app/>

- serverless-adv-blog is scalable platform with ability to handel many user.
- deployed on Cloudflare, serverless backend.
- postgres and prisma orm is used, acceleration pool connection is established.
- In house authentication makes sure privacy and no data leak.
- rate limiter is used to prevent excess use of api's
- challenge - handling env variables, reading docs

url-shorter - <https://github.com/noogler-eng/url-shortner>

- implement in go lang
- firebase is used as a backend
- challenge - new language, reading docs

listen-it - listen-anywhere.vercel.app

- React is used as a frontend, api's are fetched using axios.
- Spotify developer api's are used.
- states are managed, we can play song of any user and get the information of any artist

lets-connect - <https://let-s-connect-one.vercel.app/>

- nextjs is used as a full stack, auth is implemented using clerk..
- anyone can come and send their professional post and jobs.
- shad-cn ui is used and server action makes the api to be fast

Experience

J.P. Morgan Software Engineering Virtual Experience on Forage - June 2024

- Set up a local dev environment by downloading the necessary files, tools and dependencies.
- Fixed broken files in the repository to make web application output correctly.
- Used JPMorgan Chase's open source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor

NFT analyser - side project - October 2023

- Aggregating NFT's data from all over the market and creating an dashboard.
- Fixed broken files in the repository to make web application output correctly.
- connecting it with ethereum chain as transaction and making it decentralised
